

Lab test results comparing Cosmo Hi-Tac Laminating Films to competitive films

Lab tests recently performed comparing Cosmo Hi-Tac Laminating Films to competitive films show Cosmo Hi-Tac to be the most consistent and aggressive in the industry. Even on Xerox EA toners, once thought to be the most difficult to laminate, Hi-Tac performs the best.

Market Applications

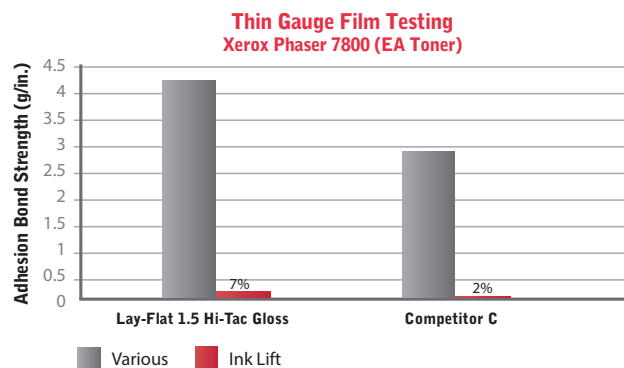

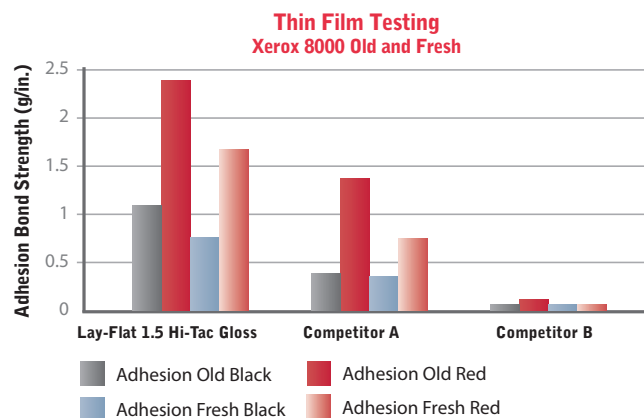

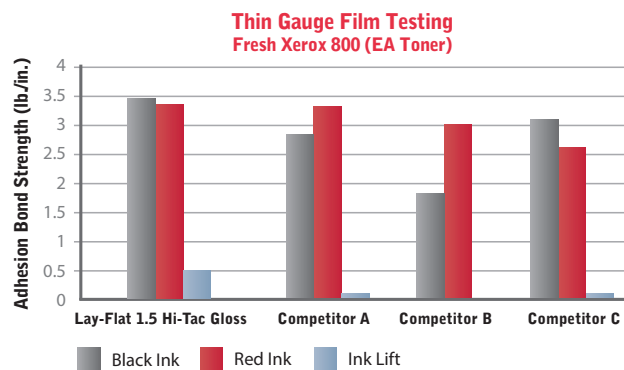

Whether aged or freshly printed sheets, or on any toner type, Hi-Tac is your first choice for creating flat and durable laminated digital prints.

- Book covers
- Postcards
- Pocket folders
- Brochures
- Presentation covers

Professional Solutions

Hi-Tac films are recommended for use on output from digital presses and printers such as Canon imagePRESS, Kodak NexPress, Xerox iGen3 and iGen4, and most DocuColor systems. Run on the Cosmo Films 6300, 7580 or other commercial laminators for fast, trouble-free, single-sided lamination.
