

Supreme Velvet Matte Film

Protects and enhances your color prints

Supreme Velvet Matte film is a polypropylene matte film with a scuff-resistant surface and a very soft feel that protects and enhances the appearance of books, packages and other printed materials. This film is primarily designed for one-sided lamination.

Features and Benefits

Supreme Velvet Matte film provides a durable, scuff-resistant surface for protecting book covers, dust jackets and more. Because the film won't scuff during production or shipping and handling, it dramatically reduces returns. The result is increased sales and higher realized margins for publishers.

Supreme Velvet Matte film has a matte finish that minimizes glare while preserving image color. The matte finish and

soft feel will attract the buyers' attention and increase the perceived value of the product.

This film accepts UV spot coating, foil stamping, and animal- and synthetic-based glues.
